

Your honor,

For more than 9 years, Debra Jean Milke is imprisoned in Perryville/Arizona awaiting her execution.

During the entire investigative phase, during trial and until sentencing, I cannot find anything factual evidence whatsoever linking Debra to this crime. Initially, she was represented by a public defender who obviously prejudiced his client's rights by lacking the competence and surely monetary means to handle such a high profile case properly. There is no forensic evidence and the entire case rests solely on an alleged confession to a police detective with questionable background as well as character assassination. Debra has adamantly denied ever having made a confession or signed any document, yet such police tactics were permitted at the time of the trial which, I understand, are no longer permitted.

Her meanwhile private attorney and investigator have uncovered a long list of inconsistencies and downright falsehoods, which the Supreme Court in Arizona has summarily denied to take into consideration.

I understand that further proceedings rest in your hands. I can only pray that the Federal Justice System is still adhering to the tenets of the United States Constitution. I am appealing to your personal and professional honor as a human being to evaluate Debra's case with moral conscience. The least I am asking for is a new and fair trial.

Very respectfully yours,
