

Your honor,

We are shocked at the verdict, Debra Jean Milke, received. All publicly accessible documentation as well as in-depth investigations of highly respected professionals and journalists show no evidence beyond reasonable doubt that Debra had anything to do with the murder of her only child.

However, it appears very obvious that she was a victim of a set of circumstances (extensive provocative media coverage from the day of her arrest, no competent legal counsel, a police and prosecutorial conspiracy to WIN this case - regardless of guilt or innocence or justice in general).

It is unbelievable that poisoning of the mind through media hype and their "cut and paste" style of influencing potential jurors can still be the basis for a fair investigation and trial, especially in a State of an extremely conservative mindset.

It is your task, Your Honor, to protect the tenets of the Constitution and to make sure that no innocent person is wrongfully convicted. Let us hope and pray that the Federal Justice System is still intact and inviolable of ulterior motives. We would like to trust in your personal integrity and your commitment to fair justice. It is, after all, a matter of life or death for a fellow human being.

Very respectfully yours,
